Cancer Letters, 72 (1993) 201–203
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 72

Acanthamoeba, free-living amoebae, cytolysis, melanoma, 91
Adenocarcinoma, serum cytokine, tumor size, cachexia, mice, 65
Alkylating agents, DNA, polyamine, human cells, 83
Altered hepatic foci, perfluorodecanoic acid, gamma-glutamyl transpeptidase, glucose-6-phosphatase, ATPase, ciprofibrate, 111
Amino acids, tumour necrosis factor-α, blood, rats, 71
Antimetastasic drugs, human colon tumor, metastasis, intrasplenic-nude mouse model system, 39
Arachidonic acid, phospholipase A_2, human breast cancer cell line, phospholipids, tumorigenesis, 31
Arecanut, black mustard, detoxication enzymes, modulatory potential, 45
Aroclor 1254, cigarette smoke, ethanol, cytogenetics, micronucleus test, bone marrow, pulmonary alveolar macrophages, 183
Ascites hepatoma, flow cytometry, Yoshida AH-130, tumour, rats, 169
Ascorbic acid, cervical carcinogenesis, inhibition, 121
ATPase, perfluorodecanoic acid, gamma-glutamyl transpeptidase, glucose-6-phosphatase, ciprofibrate, altered hepatic foci, 111

Benzo(*a*)pyrene, DNA adducts, DNA intercalation, lymphocytes, mutations, 163
Bifunctional inducer, modulatory influence, black pepper, detoxication system, 5
Black mustard, arecanut, detoxication enzymes, modulatory potential, 45
Black pepper, modulatory influence, detoxication system, bifunctional inducer, 5
Blood, gamma/delta T cells, radiation therapy, prostatic cancer, 175
Blood, tumour necrosis factor-α, amino acids, rats, 71
Bone marrow, cigarette smoke, ethanol, Aroclor 1254, cytogenetics, micronucleus test, pulmonary alveolar macrophages, 183
Breast cancer, glutathione, glutathione-reductase, nucleic acids, tumours, 11

Ca^{2+} mobilization, SK&F 96365, human brain tumor, 77
Cachexia, serum cytokine, tumor size, adenocarcinoma, mice, 65
Cancer incidence, Surinam, racial/ethnic susceptibility, 17
Carcinogenesis, esophageal cancer, squamous cell carcinoma, dysplasia, multiple cancer, 141
Cell communication, glucocorticoids, cell transformation, 25
Cell transformation, glucocorticoids, cell communication, 25
Cervical carcinogenesis, ascorbic acid, inhibition, 121
Cigarette smoke, ethanol, Aroclor 1254, cytogenetics, micronucleus test, bone marrow, pulmonary alveolar macrophages, 183
Ciprofibrate, perfluorodecanoic acid, gamma-glutamyl transpeptidase, glucose-6-phosphatase, ATPase, altered hepatic foci, 111
Cisplatin resistance, U2-OS cell line, PKC modulation, 53
Cyclic AMP-dependent protein kinase, malignancy, H-87, rat ascites hepatoma, 179
Cytogenetics, cigarette smoke, ethanol, Aroclor 1254, micronucleus test, bone marrow, pulmonary alveolar macrophages, 183
Cytolysis, free-living amoebae, melanoma, *Acanthamoeba*, 91
Cytotoxicity, iron, polyunsaturated fatty acid, human breast tumor cells, tissue culture, 99
Cytotoxity, ultrasound, photosensitizing drug, Photofrin II, HL-60 cell, 195

Detoxication enzymes, arecanut, black mustard, modulatory potential, 45
Detoxication system, modulatory influence, black pepper, bifunctional inducer, 5
Differentiation, HL-60, linoleic acid, 1
DNA adducts, benzo(*a*)pyrene, DNA intercalation, lymphocytes, mutations, 163
DNA adducts, phenethyl isothiocyanate (PEITC), *N*-nitrosomethylbenzylamine (NMBA), esophageal tumor, 103
DNA intercalation, benzo(*a*)pyrene, DNA adducts, lymphocytes, mutations, 163
DNA, alkylating agents, polyamine, human cells, 83
DNA, inhaled tritiated propylene oxide, nasal cavities, 157
Dysplasia, esophageal cancer, squamous cell carcinoma, carcinogenesis, multiple cancer, 141

Esophageal cancer, squamous cell carcinoma, dysplasia, carcinogenesis, multiple cancer, 141
Esophageal tumor, phenethyl isothiocyanate (PEITC), *N*-nitrosomethylbenzylamine (NMBA), DNA adducts, 103
Ethanol, cigarette smoke, Aroclor 1254, cytogenetics, micronucleus test, bone marrow, pulmonary alveolar macrophages, 183

F344 rat, pesticides, hepatocarcinogenesis, GST-P positive foci, rapid bioassay, 59

Fibroadenoma, inhibin (10.5 kDa), human breast carcinoma, 127
Flow cytometry, Yoshida AH-130, ascites hepatoma, tumour, rats, 169
Free-living amoebae, cytolysis, melanoma, *Acanthamoeba*, 91

Gamma-glutamyl transpeptidase, perfluorodecanoic acid, glucose-6-phosphatase, ATPase, ciprofibrate, altered hepatic foci, 111
Gamma/delta T cells, radiation therapy, prostatic cancer, blood, 175
Glucocorticoids, cell communication, cell transformation, 25
Glucose-6-phosphatase, perfluorodecanoic acid, gamma-glutamyl transpeptidase, ATPase, ciprofibrate, altered hepatic foci, 111
Glutathione-reductase, glutathione, nucleic acids, breast cancer, tumours, 11
Glutathione, glutathione-reductase, nucleic acids, breast cancer, tumours, 11
GST-P positive foci, pesticides, hepatocarcinogenesis, rapid bioassay, F344 rat, 59

H-87, malignancy, cyclic AMP-dependent protein kinase, rat ascites hepatoma, 179
Hepatocarcinogenesis, pesticides, GST-P positive foci, rapid bioassay, F344 rat, 59
HL-60 cell, ultrasound, photosensitizing drug, Photofrin II, cytotoxity, 195
HL-60, differentiation, linoleic acid, 1
Human brain tumor, SK&F 96365, Ca^{2+} mobilization, 77
Human breast cancer cell line, phospholipase A_2, arachidonic acid, phospholipids, tumorigenesis, 31
Human breast carcinoma, inhibin (10.5 kDa), fibroadenoma, 127
Human breast tumor cells, iron, polyunsaturated fatty acid, cytotoxicity, tissue culture, 99
Human cells, alkylating agents, DNA, polyamine, 83
Human colon tumor, metastasis, intrasplenic-nude mouse model system, antimetastasic drugs, 39
Hydroperoxides, synthetic flavonoids, mouse skin, ornithine decarboxylase, macromolecule synthesis, tumor promotion, 149

Inflammatory dermatoses, sICAM-1, melanoma, 191
Inhaled tritiated propylene oxide, DNA, nasal cavities, 157
Inhibin (10.5 kDa), human breast carcinoma, fibroadenoma, 127
Inhibition, ascorbic acid, cervical carcinogenesis, 121
Intrasplenic-nude mouse model system, human colon tumor, metastasis, antimetastasic drugs, 39
Iron, polyunsaturated fatty acid, cytotoxicity, human breast tumor cells, tissue culture, 99

Linoleic acid, HL-60, differentiation, 1
Lymphocytes, benzo(*a*)pyrene, DNA adducts, DNA intercalation, mutations, 163

Macromolecule synthesis, synthetic flavonoids, mouse skin, ornithine decarboxylase, hydroperoxides, tumor promotion, 149
Malignancy, cyclic AMP-dependent protein kinase, H-87, rat ascites hepatoma, 179
Melanoma, free-living amoebae, cytolysis, *Acanthamoeba*, 91
Melanoma, sICAM-1, inflammatory dermatoses, 191
Metastasis, human colon tumor, intrasplenic-nude mouse model system, antimetastasic drugs, 39
Mice, serum cytokine, tumor size, cachexia, adenocarcinoma, 65
Micronucleus test, cigarette smoke, ethanol, Aroclor 1254, cytogenetics, bone marrow, pulmonary alveolar macrophages, 183
Modulatory influence, black pepper, detoxication system, bifunctional inducer, 5
Modulatory potential, arecanut, black mustard, detoxication enzymes, 45
Mouse skin, synthetic flavonoids, ornithine decarboxylase, hydroperoxides, macromolecule synthesis, tumor promotion, 149
Multiple cancer, esophageal cancer, squamous cell carcinoma, dysplasia, carcinogenesis, 141
Mutations, benzo(*a*)pyrene, DNA adducts, DNA intercalation, lymphocytes, 163

Nasal cavities, inhaled tritiated propylene oxide, DNA, 157
N-nitrosomethylbenzylamine (NMBA), phenethyl isothiocyanate (PEITC), esophageal tumor, DNA adducts, 103
Nucleic acids, glutathione, glutathione-reductase, breast cancer, tumours, 11

Ornithine decarboxylase, synthetic flavonoids, mouse skin, hydroperoxides, macromolecule synthesis, tumor promotion, 149

Perfluorodecanoic acid, gamma-glutamyl transpeptidase, glucose-6-phosphatase, ATPase, ciprofibrate, altered hepatic foci, 111
Pesticides, hepatocarcinogenesis, GST-P positive foci, rapid bioassay, F344 rat, 59
Phenethyl isothiocyanate (PEITC), *N*-nitrosomethylbenzylamine (NMBA), esophageal tumor, DNA adducts, 103
Phospholipase A_2, human breast cancer cell line, arachidonic acid, phospholipids, tumorigenesis, 31
Phospholipids, phospholipase A_2, human breast cancer cell line, arachidonic acid, tumorigenesis, 31
Photofrin II, ultrasound, photosensitizing drug, HL-60 cell, cytotoxity, 195
Photosensitizing drug, ultrasound, Photofrin II, HL-60 cell, cytotoxity, 195
PKC modulation, U2-OS cell line, cisplatin resistance, 53
Polyamine, alkylating agents, DNA, human cells, 83
Polyunsaturated fatty acid, iron, cytotoxicity, human breast tumor cells, tissue culture, 99
Prostatic cancer, gamma/delta T cells, radiation therapy, blood, 175
Pulmonary alveolar macrophages, cigarette smoke, ethanol, Aroclor 1254, cytogenetics, micronucleus test, bone marrow, 183

Racial/ethnic susceptibility, cancer incidence, Surinam, 17
Radiation therapy, gamma/delta T cells, prostatic cancer, blood, 175
Rapid bioassay, pesticides, hepatocarcinogenesis, GST-P positive foci, F344 rat, 59
Rat ascites hepatoma, malignancy, cyclic AMP-dependent protein kinase, H-87, 179
Rats, flow cytometry, Yoshida AH-130, ascites hepatoma, tumour, 169
Rats, tumour necrosis factor-α, blood, amino acids, 71

Serum cytokine, tumor size, cachexia, adenocarcinoma, mice, 65
SICAM-1, melanoma, inflammatory dermatoses, 191
SK&F 96365, human brain tumor, Ca^{2+} mobilization, 77
Squamous cell carcinoma, esophageal cancer, dysplasia, carcinogenesis, multiple cancer, 141
Surinam, cancer incidence, racial/ethnic susceptibility, 17
Synthetic flavonoids, mouse skin, ornithine decarboxylase, hydroperoxides, macromolecule synthesis, tumor promotion, 149

Tissue culture, iron, polyunsaturated fatty acid, cytotoxicity, human breast tumor cells, 99
Tumor promotion, synthetic flavonoids, mouse skin, ornithine decarboxylase, hydroperoxides, macromolecule synthesis, 149
Tumor size, serum cytokine, cachexia, adenocarcinoma, mice, 65
Tumorigenesis, phospholipase A_2, human breast cancer cell line, arachidonic acid, phospholipids, 31
Tumour necrosis factor-α, blood, amino acids, rats, 71
Tumour, flow cytometry, Yoshida AH-130, ascites hepatoma, rats, 169
Tumours, glutathione, glutathione-reductase, nucleic acids, breast cancer, 11

U2-OS cell line, cisplatin resistance, PKC modulation, 53
Ultrasound, photosensitizing drug, Photofrin II, HL-60 cell, cytotoxity, 195

Yoshida AH-130, flow cytometry, ascites hepatoma, tumour, rats, 169
